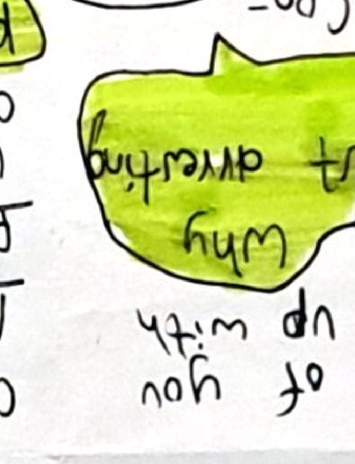
I know a lot of you picked this up with a sniff, saying why would I protest arresting criminals?



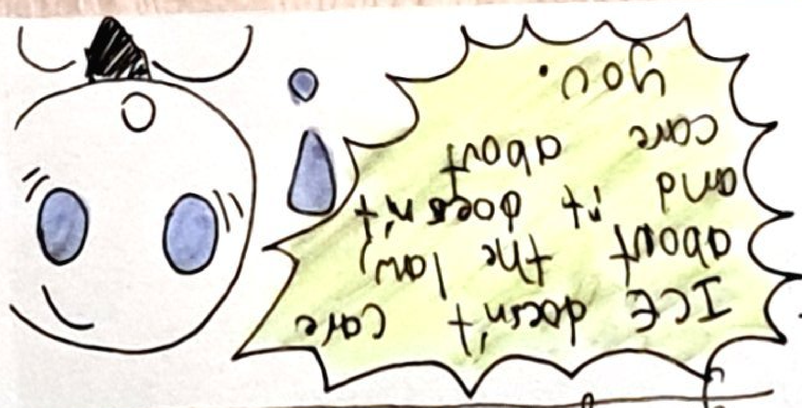
According to Congress, ICE has a transparently broad mandate. Based on ICE's released info: only 26% of detainees as of Nov. 16 are convicted criminals. Another 26% have pending charges.

THIS MEANS

a whopping 48% have NO record other than POTENTIALLY being here without a visa or civil offense). Why do I say potentially?

In traditional cases, illegal entry is handled in immigration courts. But Trump's firing all the judges. People are being detained regardless of their papers out of assumptions made by officers without the legal jurisdiction. Usually, someone would only be fully deported after a court case.

Now, not so much. You may think being antiICE means I'm antienforcing the law, but quite the opposite. ICE is breaking the law. They have conducted warrant-less arrests entered homes w/o judicial warrants (your fourth ammendment) detainment cause, excessive force, and ignoring federal court orders.



ICE also recently has begun to encroach upon our first ammendment. Anyone speaking against the current administration is now being labeled a **domestic terrorist** for criticizing the government, which is what our ammendment is for. Theyre openly planning to use social media mapping programs to target us for our OPINIONS using HSI a division for tracking drug lords not citizens with opinions.

It you care about free speech this should concern you. Next the gov could go after anyone criticizing the president or a specific law, or for our religions. What our country was founded for.

Protect our land of the free!

Spread the info, be skeptical of unsourced information online, stay educated. Make zines using credible sources, and protest peacefully.

We will overcome this.
